## Digest

**Bulk and High-Value Exports Change Little in FY 1990** (see p. 2). U.S. agricultural exports totaled \$40 billion during fiscal year (FY) 1990 (October 1989-September 1990), just about unchanged from a year earlier. Corn, cotton, fruit, and vegetable exports rose, and wheat, rice, soybean, and soybean meal export value dropped. Much of the reported increase in fruit and vegetable exports reflected revised procedures for collecting U.S. export data rather than increased shipments of goods to other countries.

**FY 1990 Imports Gain 5 Percent** (see p. 7). Imports of FY 1990 agricultural products rose 5 percent to \$22.5 billion, led by an 11-percent gain for competitive items, such as cattle, beef, cheeses, fruit, fruit juices, fresh vegetables, and sugar.

**Credit Guarantee Programs Make Up 12 Percent of U.S. Exports** (see p. 8). U.S. agricultural exports under the Commodity Credit Corporation's (CCC) export credit guarantee programs increased 29 percent in FY 1989 to \$4.77 billion.

## **Bulk and High-Value Exports Change Little in FY 1990**

U.S. agricultural exports totaled \$40 billion during FY 1990 (October 1989-September 1990), just about unchanged from a year earlier. Corn, cotton, fruit, and vegetable exports rose, and wheat, rice, soybean, and soybean meal export value dropped. Much of the reported increase in fruit and vegetable exports reflected revised procedures for collecting U.S. export data rather than increased shipments of goods to other countries.

FY 1990 marks the first year under revised procedures for collecting data on U.S. exports, agricultural and nonagricultural, to Canada. Historically, the value reported by the U.S. Government for exports to Canada was smaller than the value reported by the Canadian Government for imports from the United States. During the 1980's, this undercounting increased, and by 1989, about 40 percent of all U.S. agricultural products exported to Canada were not included in official U.S. trade statistics. Therefore, beginning January 1990, the U.S. Government used adjusted Canadian import statistics to measure U.S. exports to Canada. Since earlier data were left unrevised, this change accounted for much of the large increase reported in U.S. agricultural exports to Canada during FY 1990. Exports totaled \$3.7 billion in FY 1990, \$1.5 billion more than was reported for 1989.

Based on the apparent degree of undercounting in previous years, \$1.2 billion of the \$1.5-billion increase was probably due solely to the change in reporting. The remaining \$300 million represents an actual increase in the amount of U.S. agricultural products shipped to Canada. Since FY 1989 exports to Canada totaled \$2.2 billion, the \$300 million represents a 14-percent increase. Although Canada's economy slowed during 1990, the exchange rate between the U.S. and Canadian dollars was favorable for U.S. exports.

If the reported value of U.S. agricultural exports is adjusted downward to account for revised reporting procedures, then exports totaled \$39 billion during FY 1990, compared with \$39.6 billion in FY 1989. With the adjustment, exports fell \$600 million in FY 1990. Without the adjustment, exports apparently rose nearly \$600 million. Given that \$600 million equals less than 2 percent of FY 1989's \$39.6 billion in exports, neither change is particularly significant.

However, since most of the products exported to Canada are high-value products, the effect of the reporting

revision was proportionally more important for this subset of exports. Only relatively small amounts of U.S. grain and oilseeds are exported to Canada, which is a significant producer and exporter of these products itself, and imports them only to meet localized needs. For example, there is some border-region trade between Canada and the United States in wheat, and Eastern Canada imports some U.S. corn and soybeans. U.S. cotton is consumed by Canada's textile industry, but just \$65 million was shipped north in FY 1990. Thus, although grains, oilseeds, and cotton account for most of the U.S. farm products shipped to other countries, exports to Canada are instead dominated by fruits, vegetables, meats, and other consumer goods. These products have come to be called high-value products (HVP), a name intended to distinguish them from bulk products like wheat and soybeans with relatively low prices per unit of weight.

### **High-Value Exports 2 Percent Lower**

U.S. exports of agricultural HVP's have been steadily increasing since 1985, when the U.S. dollar began declining on foreign exchange markets and overseas economic activity began accelerating. Record-high exports were recorded in FY 1988 and again in 1989, \$19 billion in the latter year. Reported HVP exports in FY 1990 totaled \$20 billion, another record. However, since much of this increase stemmed from revised reporting procedures for trade with Canada, it is likely that HVP exports actually fell during FY 1990. Although the decline would be slight, less than 2 percent, it would be the first decline since 1985.

Although HVP exports to Canada rose \$300 million, losses elsewhere offset this and other isolated gains. Other gains included a \$155-million increase in animal product exports to the USSR and a \$109-million increase in animal product exports to South Korea.

However, several factors were offsetting. In the case of animal products, exports to Mexico fell from \$975 million to \$643 million, about where it had been 2 years earlier. Exports had risen sharply in FY 1989 as the Mexican Government sought to implement price controls. Producers were reluctant to market their products under controlled prices so increased imports were necessary to maintain supplies.

Grapefruit exports fell \$67 million as a freeze in Texas and Florida drastically reduced production. The freeze was particularly significant for exports because even if grapefruit were not destroyed by the freeze, they were damaged. Only the highest quality grapefruit are

exported because of the additional costs of shipping overseas and the loss that rejection upon arrival would entail. The largest market for these grapefruit is Japan, where consumers are notoriously concerned with quality.

The largest losses occurred among the HVP's with the least value-added, vegetable oil and oilcake and meal. Generally, these goods are least removed from the original bulk products by virtue of being the least transformed and the least differentiated. As a result, they are more volatile than other HVP's. In FY 1990, oilcake and meal exports fell \$336 million, and vegetable oil exports fell \$78 million. Both fell by smaller amounts in FY 1989.

Until 1990, growth in the more highly differentiated and processed HVP's had been sufficient to offset declines in semi-processed oilseed products. Several factors, however, were different in FY 1990. One was macro-economic: the dollar, in real HVP-trade-weighted

terms, began FY 1990 stronger than it had been a year earlier. The last time that happened was FY 1985, and that was also the last time the HVP exports fell. Another was micro-economic: Japanese consumers' demand for imported beef slowed after several years of strong increases. U.S. beef exports to Japan rose from \$760 million in FY 1988 to \$1 billion in FY 1989. However, in FY 1990, exports fell to \$947 million, a 9-percent decline. Japan is the most important market for U.S. animal product exports, accounting for much of the growth in recent years.

Bulk exports also reversed the trend of the past 2 years and fell slightly in FY 1990. Corn and cotton exports rose as world trade and the U.S. share of world trade grew, but falling wheat and soybean exports offset these gains. Corn and cotton exports climbed \$820 million and \$664 million, respectively, while wheat and soybean exports fell \$1.8 billion and \$146 million, respectively. ## FY 1990 Imports Gain 5 Percent

Imports of agricultural products during FY 1990 rose 5 percent to \$22.5 billion, led by an 11-percent gain for competitive items such as cattle, beef, cheeses, fruit, fruit juices, fresh vegetables, and sugar. Noncompetitive import value fell 10 percent, mainly due to lower coffee prices and declining crude rubber purchases. Competitive farm products accounted for a record 75 percent of all agricultural imports, up sharply from 1988/89's 71 percent.

Cattle imports set a record at nearly 2 million head. Relatively high U.S. prices attracted feeder steers from Mexico and fed cattle from Canada. Contributing factors included Mexico's relaxation of export restrictions and declining exchange rates for the peso.

Beef import volume surged 12 percent to more than 750,000 tons, while higher prices drove value up more than 20 percent to \$1.8 billion. Shipments increased from nearly every country, with Australia's volume gain of 42 percent to 350,000 tons more than offsetting lower shipments from New Zealand. The United States imported mostly lean boneless beef and exported higher valued cuts.

Dairy product imports in FY 1990 totaled just under \$1 billion, up 14 percent from last year. Cheese imports increased rapidly to 142,000 tons, primarily for quota cheeses such as Italian and feta types. Casein imports, used in low-fat cheese production, jumped 25 percent to 94,000 tons, with much of the growth coming from Ireland and New Zealand.

Fruit imports gained 10 percent in value to \$1.2 billion, with major expansion in fresh grapes from Chile. Orange juice imports, mostly from Brazil and Mexico, surged almost 40 percent, reflecting a poor U.S. crop last season. Fresh vegetable imports increased about a third, led by tomatoes, onions, peppers, potatoes, squash, and other produce.

Coffee import volume advanced 19 percent to almost 1.3 million tons in FY 1990. Larger purchases from Mexico, Central America, Colombia, Thailand, Indonesia, and Ethiopia more than offset sharp declines in shipments from Brazil and the Ivory Coast. Suspension of export quotas by the International Coffee Organization in July 1989 created free market conditions allowing exporting countries to ship accumulated stocks to consuming countries. Prices plunged more than 30 percent to 70 cents per pound. (Thomas A. Warden, Commodity and Trade Analysis Branch)

## Credit Guarantee Programs Make Up 12 Percent of U.S. Exports

U.S. agricultural exports under the Commodity Credit Corporation's (CCC) export credit guarantee programs increased 29 percent in FY 1989 to \$4.77 billion. This represented the largest value under the programs to date, and was 12 percent of the \$40 billion in total U.S. agricultural exports. An additional \$253 million of program exports was for wood products, leather, and yarn, which are not considered agricultural exports.

The CCC offers two export credit guarantee programs, the Export Credit Guarantee Program (known as GSM-102) and the Intermediate Credit Guarantee Program (GSM-103). Limited foreign exchange is often a constraint to developing-country imports, making the opportunity to purchase on credit an attractive, if not essential, option. GSM-102 and GSM-103 are attempts to ease foreign exchange constraints and enhance U.S. export opportunities. By guaranteeing loan repayment, the CCC encourages private U.S. financial institutions to extend credit to foreign purchasers.

The GSM-102 program, begun in FY 1981, provides credit guarantees for commercial credit of from 6 months to 3 years. In FY 1989, \$4.37 billion in agricultural commodities were exported to 29 countries under GSM-102. The GSM-103 program differs from GSM-102 by offering credit guarantees for loans of more than 3 years and up to 10 years. GSM-103, authorized by the 1985 Food Security Act, is a smaller program than GSM-102. In FY 1989, exports to 11 countries under GSM-103 totaled \$396 million.

The largest recipient countries under the GSM-102 and GSM-103 programs in FY 1989 were Mexico, Iraq, and Algeria. Together, these three countries received 55 percent of credit program exports. Purchasers in Mexico imported \$1.25 billion through GSM-102 and GSM-103. Primary commodities were corn (\$336 million), soybeans (\$300 million), and sorghum (\$190 million). Iraqi buyers imported \$835 million of agricultural commodities under CCC credit guarantees. Wheat, rice, and protein concentrates represented the bulk of Iraqi program imports at \$198 million, \$192 million, and \$86 million, respectively. Algeria imported \$566 million in

U.S. commodities under the programs. Wheat (\$120 million) and corn (\$128 million) were the major program commodities of Algerian importers.

Primary commodities exported under the GSM-102 and GSM-103 programs in FY 1989 were consistent with previous years. In some cases, exports under credit guarantee programs accounted for a significant portion of total U.S. exports of that commodity to a given country. Exports under both GSM-102 and GSM-103 were most heavily concentrated toward wheat. Twenty-nine percent of FY 1989 exports under GSM-102 were wheat, with a value of \$1.27 billion. The primary GSM-102 importing countries for wheat were Egypt and Algeria, who received 56 percent of wheat exports facilitated through the program. Under the GSM-103 program, 54 percent of total program exports were for wheat, 78 percent of which went to Morocco and Bangladesh. Combined GSM-102 and GSM-103 program wheat exports represented 25 percent of total U.S. wheat exports for FY 1989. Algeria, Ecuador, Iraq, Mexico, Trinidad, Turkey, and Yemen imported over 90 percent of their U.S. wheat under credit guarantee programs.

Exports of corn valued at \$653 million represented the second largest commodity shipped under export credit guarantee programs. Mexico and Algeria accounted for 71 percent of GSM-102 corn exports. Mexico was also the largest importer of the \$653 million in corn exported under the GSM-103 program. Together with Jordan, 82 percent of GSM-103 corn exports were concentrated in these two countries. Export credit programs facilitated 11 percent of total FY 1989 U.S. corn exports. Over 90 percent of U.S. corn exports to Algeria, Chile, and Jordan was through these programs.

Soybeans, the third largest GSM-102 commodity, represented 9 percent of total program exports. Eighty-one percent of the \$431 million in program soybean exports headed for Mexico and Korea. Eleven percent of total U.S. soybean exports were made under the GSM-102 program. No soybeans were exported under the GSM-103 program. Tobacco (\$30 million) was the third largest commodity under GSM-103, accounting for 8 percent of the program total. Iraq was the only importer. (Ann Fleming, Commodity and Trade Analysis Branch)
